## 課程大綱

### Syllabus –Global Supply Chain Management

**Instructors:** Professor Dara Schniederjans

**Correspondence:** schniederjans@uri.edu

**Class Time and Place:** NTOU; See Schedule

**Textbooks: THESE ARE PROVIDED TO YOU**

1. Supply Chain Management-PPT Slides, 3<sup>rd</sup> ed., SCM Institute Publishers, Edited by Douglas M. Lambert.

2. The Goal, by Goldratt and Cox

**Pre-requisites:** BUS 355 preferred or similar course or work experience.

**Required Materials:** A laptop will be required for a few classes. To take full advantage of the class, students should bring their laptop, class notes, handouts, notebook, pen/pencil to each class.

**Class Description:** This is an international course fully devoted to the factors that impact the design and management of Global Supply Chains. It covers the strategic relationships necessary for Supply Chain management as well as the tactical activities of Logistics, Purchasing and Operations from a Global Perspective. Through the use of real-world cases, text and lectures the course examines how these activities interact with other business functions (i.e. Marketing, Information Systems, etc.)

**Course Objectives:**

**GENERAL OBJECTIVE:** To apply world-class tools and techniques used to operate efficient and effective global supply chains. The goal is to learn how to manage supply chain strategies that support overall corporate objectives.

**LEARNING OBJECTIVES:** By the end of this course, the student will be able to understand Supply Chain Management from a global multi-dimensional perspective. Students will be able to analyze a company's strategic focus, its customer demand profiles and its core competencies in order to design a supply chain that supports its business model. This includes understanding global supplier capabilities (i.e. capacity, inventory management and quality) and the logistics system that delivers goods to domestic and international markets. By the end of this course, the student will be able to,

- Identify and chart a global company's key business functions, business processes, and stakeholders.
- Understand the role of Logistics, Purchasing and Operations in the design and operation of global supply chains.
- Identify and calculate global supply chain cost drivers.
- Understand the key activities that differentiate US business practices from other countries- and how they affect management of the supply chain.
- Identify key performance indicators (KPI's) that correctly evaluate global supply chain systems and lead to improved inventory control.
- Understand how interruptions in the global supply chain affect business and how to minimize the negative effects.
- Examine how world-class companies encourage collaboration among international business partners.

**Attendance Policy:**

Attendance in all class periods is important because it is a compressed course, and missing and assignment or company visit will place the student behind. The majority of course material will be delivered through class lectures, discussions, team exercises, handouts and company visits. Due to demands on professional students, each student team must be especially diligent in keeping up with class work.

**Grading System:**

Deliverable	Points
The Goal Assessment	300 points
Case Presentations or Negotiation Groups	300 points
Company/Cultural Visit Presentation	300 points
NPD Exercise	50 points (25 points for presentation, 25 points for paper)
Participation (Site Visits, In Class Activities/Discussion)	100 points
	<b>1050 points total</b>

The following point system will correspond to grades:

Letter Grade	Percentage
A	94
A-	90
B+	87
B	84
B-	80
C+	77
C	74
C-	70
D+	67
D	60
F	<60

**Assignments:*****The Goal Assessment:***

One exam will consist of reading a book called ***The Goal*** by Cox and Goldratt

***Cases (Oral and Written):***

Case study presentations: Throughout the term, case study write ups and presentations will be assigned for credit. Case study assignments that are late will be penalized 50% and those more than one class period late will receive '0' credit. Due dates are given on the syllabus. Written case work will normally be less than 1 page- 12 point font, 1.5 spacing, 1" margins; plus flow chart. Please see "Case Study Rubric" in the Cases folder in the Resources tab on sakai.

***Company/Culture Presentation:***

Each team will be asked to give a presentation of their choosing on a cultural issue. Students will be asked to relate it to material presented in class as well as the company/cultural visits. Please see "Company/Culture Presentation Rubric" in the Projects folder in the Resources tab on sakai.

**Schedule and Topics and Activities (SUBJECT TO CHANGE):**

The following schedule is to be used as a guideline and will be adjusted based on professor and student requirements. The class is both text, case and lecture-based, which means that some information is contained in the text, while other information must be obtained through the class notes and demonstrations. The class dates, tentative topic, and readings re-listed in each section. Readings for each period are to be completed before the start of the class. You should preview each section ahead of time to avoid missing assignment due dates. Students will be informed in class of major changes to the schedule. During the classes for laboratory assignments, students will be working on computers. All cases will be analyzed in class. The GOAL book must be read outside of class.
